

Readiness Seminar

Audience:

Anyone who is considering the implementation of, or migration to Project Server for the enterprise. Senior Project Managers, Directors of PMO, Directors of IT, Scheduling Managers, Resource Managers, CXO's interested in improving the capacity and capability of their Project management function.

Objectives:

- Provide a guided tour through an Implementation Readiness Scorecard to assess readiness for an EPM implementation.
- Provide an overview of the major function blocks within a Microsoft Project Server & Project Professional system.
- Outline the major areas of economic justification for the implementation of an Enterprise Project Management (EPM) platform.

Takeaways:

EIF documentation including: Setup & Overview, EIF Project plan, EIF Interview, EIF Requirements Specification, EIF Red Flags document, EIF Systems Design Guidelines, EIF Database Size Analysis

Presenter:

Ken Barnhart, President of Occam Group, is one of nations leading EPM consultants. Ken's team has award winning experience successfully deploying EPM solutions for some of the biggest names in the country.

"Ken Barnhart was a dynamic, very interesting instructor with extensive real world background. His credentials as a 'ground floor' participant with Microsoft in the EPM rollout are impressive."

-Jim Tater, Ohio National

Topics Include:

- Project product family—Server, Professional, and Project Web Access
- Project Server Architecture, Scalability and Customization
- Project Collaboration
- Skills Based Resource Management
- Portfolio Management and Analysis
- Enterprise Templates and Resource Codes
- Advanced Reporting and Business Analysis

Building a Business Case for:

- Improved Visibility & Governance
- Improved Schedule Performance
- Improved Resource Management
- Improved Communication & Collaboration

Case Study:

Ken will demonstrate the award winning solution developed for Bristol Myers Squibb and walk through the business case for this successful project. This case study is a powerful example of both the financial value of EPM systems and why good requirements development is so crucial to success.

You won't want to miss this.
