
MDP 403-Certificate in Applied Project Management

In today's competitive economic environment, companies succeed or fail based on their ability to bring quality products and services to market in a timely manner. It is the project manager's job to make sure that this happens.

The Project Management Evening Certificate program is geared towards today's busy professional who can't afford to take time away from an already tight schedule. In a convenient evening format, it takes only 13 weeks to earn your Project Management certificate. This is done by successfully completing 24 scheduled 3-hour sessions that address key topic areas in project management, such as the project environment, planning, scheduling, and estimating. You will then be able to apply these skills directly into your own projects in the workplace.

Real-world projects

During the program, you will work in teams to plan a real-world project. Working in teams accelerates your learning and prepares you to deal with projects on the job. You will learn to identify problems currently faced in business and work to solve them.

Standards based

The entire curriculum is based on the Project Management Institute's (PMI®) Project Management Body of Knowledge (PMBOK®). It will provide you with a solid foundation to prepare for taking and passing the PMP® (Project Management Professional) exam. Most importantly, our program meets the standards set forth by PMBOK® (Project Management Body of Knowledge).

- Our program is compliant with the Project Management Body of Knowledge (PMBOK®).
- Our program serves as a solid foundation for the pursuit of Project Management Professional (PMP®) certification.
- BUCEC is recognized as the only university on the Project Management Institute's (PMI®) Corporate Council, and is a Registered Education Provider Charter Member of PMI®.

Our focused curriculum is taught by skilled project management practitioners. As a result, you get the right mix of theory and practical experience to help accelerate your learning and provide you with the skills necessary to bring your company success.

More importantly, our program meets the standards set forth by PMBOK® (Project Management Body of Knowledge).

MDP 403-Certificate in Applied Project Management-cont'd

With the failure rate of projects running at 70 percent and higher across all industries, employees with strong project management skills are in high demand. How do you acquire the project management skills that employers are looking for? Through certification, which provides a standard of performance and a recognized professional credential for both employer and employee. For 13 weeks students meet on Tuesday and Thursday for 3 consecutive hours on each day. This program assures you a comprehensive project management experience. This unique evening format allows tools and techniques taught in class to be practiced within the framework of your current business.
